

The things that make us sick are called **Germs!**

Germs can enter into your body through your eyes, nose, or mouth.

Germs can be passed to you when a sick person sneezes, coughs, talks, or kisses you.

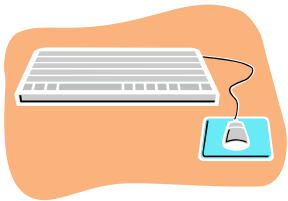

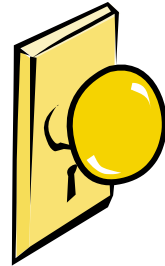

It may sound crazy, but you can get sick from germs that someone else left on things up to **1 DAY** before you touch them!

• **Germs** can live on things like: **•**

• **Telephones** •

• **Doorknobs** •

• **Keyboards and Mice** •

• **Basically, almost anything we touch!!!** •

Wash your hands often and as best as you can!
